## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-2, 5-14, 17-24, 50-51, 54-62 and 65-79 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or rendered obvious the processing of script data and rundown data to define individual segments of the television program and determining identifiers for each of the segments, as argued by Applicant in regards to the definitions, found in the specification of the instant application, defining rundown data and program segments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

As argued by Applicant rundown teaches away from the timing data of Van Thong. Figure 4 and Paragraph 0062 defines rundown data as television production data, which details portions/segments of the television program according to subject matter in the television program itself, not a person speaking as defined by Van Thong by using the start and end times of when spoken text is to appear using closed captioning in a television program.

The Applicant also argues that the specification of the instant application also clearly defines that a program segment (*as claimed*) corresponds to a specific subject, such as movies, sit-coms and sporting events (see Paragraph 0055 of the instant

**application).** Van Thong only teaches that the program segments represents portions of the television program where a character is speaking, not the subject matter found in the television program.
